

STACKER RACK

Stacker Rack provides portable dense storage to maximize floor space as needed.

Stacker Rack:

- Easily assembles
- Stores densely when not in use
- Floor stacks up to 5 levels high
- Handles unstackable product
- Increases density
- Manages seasonal peaks
- Stores bulky, fragile, or odd shaped products

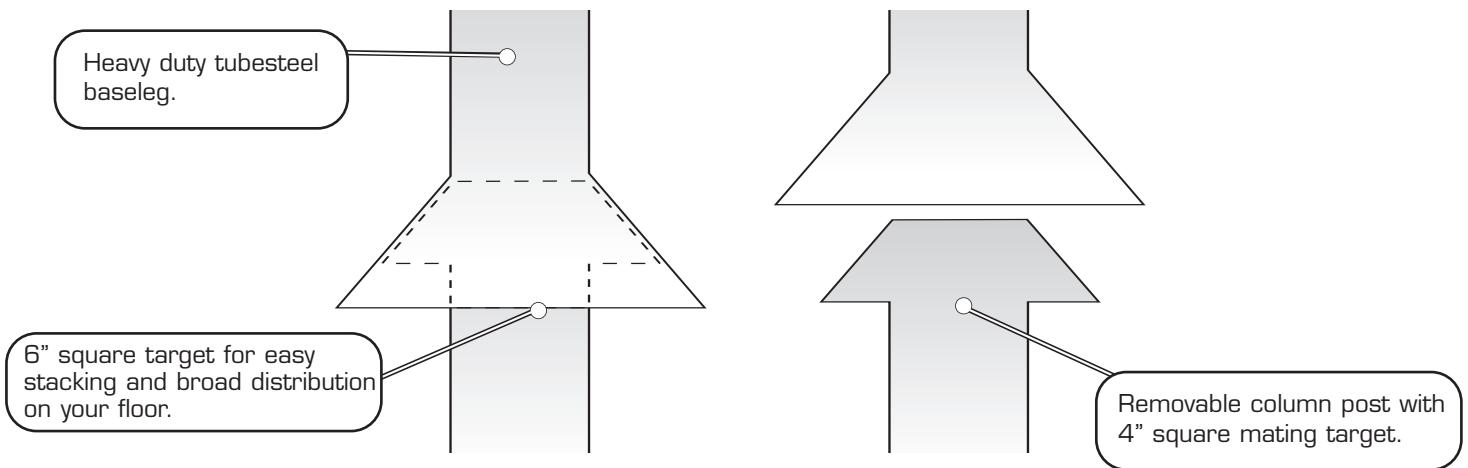

Frazier guarantees quality manufacturing, on-time delivery and reliable service for Stacker Rack and all of our products

Benefits:

- Flexible dense storage to maximize your floor space as you need it
- Increase your cube utilization by stacking 4 levels high or higher (approval from our engineering staff for your specific application)

When not in use, Stacker Rack stores densely allowing you to use your floor space as needed

Features:

- Each unit consists of a base unit with a deck and 4 legs. Each leg has a 6" square stacking target mounted on the bottom of the leg for easy assembly
- Each unit consists of four removable posts with a 4" square stacking target mounted on the top of each post. **This target not only makes the stacking operation easier, but due to the tight fit once in place, reduces deflection and sway, therefore enhancing performance**
- The base units and posts come in several sizes to meet your specific storage needs
- The base units are available as two way units or four way units allowing fork truck access as you specify
- A recessed wire mesh deck is optional for utilization with non-palletized products
- Stacker Rack has been designed by professional engineers and tested to meet the Rack Manufacturers Institute (RMI) specifications
